St Gregory's Curriculum Overview
Subject Area - Computing 2026 – 2027

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
EYFS	Although computing is not a standalone area of learning or an Early Learning Goal within the Early Years Foundation Stage (EYFS) Statutory Framework, it is embedded throughout our continuous provision, adult-led activities and wider curriculum. Children are provided with meaningful opportunities to explore and use technology through play, investigation and practical experiences. Through age-appropriate activities, children develop early computational thinking skills, including following instructions, recognising patterns, sequencing, predicting and solving problems. Children are also introduced to the importance of using technology safely and responsibly. Our approach ensures that children develop curiosity, confidence and the foundational skills needed to support their transition into the National Curriculum for Computing in Key Stage 1.
